Price, Quality, Safety & Performance
How can we help your business?

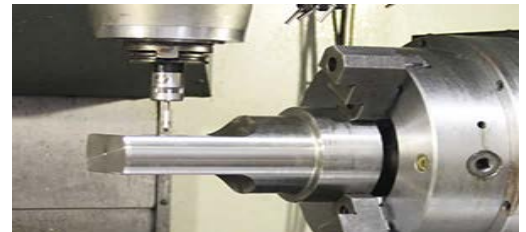

Veracity Machine, LLC provides specialized machined and welded components to a variety of global customers in the oil & gas, aerospace, automotive, dredging, and agriculture industries.

Mission: To provide our customers with timely, well-priced, high-quality products. We accomplish this with a climate-controlled facility, strong quality system and well-trained personnel. We pride ourselves in listening to our customer's needs and translating those needs into continuously improved products and services.

Core Specialties – In House

Machining

- Precision CNC and manual lathes, mills and cutting
- 25" max diameter and 84' max cut length

Welding

- SAW and GTAW processes
- Overlay and joining capabilities ABS/DNV approved
- Stress relief oven

NDE Inspection

- Climate-controlled inspection facility
- Dimensional, MPI, UT, LP, and hardness inspection

Engineering Design

- Professional Engineering personnel on staff

Additional Capabilities – Through Qualified Partners

- Coating: Xylan, Epoxy & Phosphate
- Hard facing: Nickel, Colmony & Stellite
- Heat treatment
- Shipping: packaging & transportation

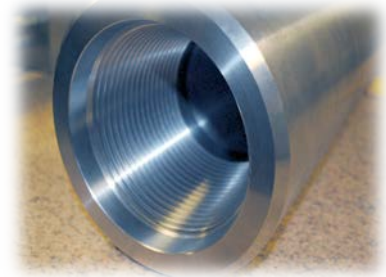

Additional Capabilities – ExPert Riser Solutions- Port Fourchon, La

- Full in-house offshore fabrication and repair facility
- 53 acres ,700 foot deepwater access with two 75 ton cranes
- Marine riser and tubular fabrication and repair capabilities
- Structural fabrication
- Full cleaning, inspection and coating capabilities
- API Q1, API ISO 9001 and ISO TS 29001

Machine List for Veracity Machine LLC – All less than 3 years' old

- HAAS SL N40L Lathe (26" cut diameter, 84" cut length, 7.1" through hole spindle, 9- 5/8" Prog. Omni rest, 20" 4 jaw independent chuck, 55hp)
- ST40L HAAS CNC Lathe (26" cut diameter, 84" cut length, 6.5" through hole spindle, 12.5" Omni rest, 21" 3 jaw chuck, 55hp)
- ST40L HAAS CNC Lathe with Live Tooling Center (26" cut diameter, 84" cut length, 6.5" through hole spindle, 12.5" Omni rest, 21" 3 jaw chuck, 12.5 HP Milling capability, 55hp)
- HAAS ST 30 Lathe (21" cut diameter, 26" cut length, 31.75" swing diameter, 30hp)
- Puma 300L Lathe (17" cut diameter, 60" cut length, 6-5/8" Prog. Omni rest, 30hp)
- VF-8 HAAS MILL (4 Axis Milling station, 7.5" through hole, 16" 3 jaw chuck with 8-5/8" bore, Renishaw wireless probing, CAT50 spindle, 30hp)
- VF-8 HAAS MILL (4 Axis Milling station, 7.5" through hole, 16" 3 jaw chuck with 8-5/8" bore, Renishaw wireless probing, CAT50 spindle, 30hp)
- Programmable Auto Feed Band Saw (12" cut diameter)
- Dapra Dot Pen Stencil (programmable with serialization and logo)
- HAAS ST40 CNC Lathe (26" cut diameter, 44" cut length, 6.5" through hole spindle, 12.5" Omni rest, 21" 3 jaw chuck, 55hp)
- ARC 5 Semi-Automated Welding Machines (Hot wire pulse, 625 Inconel, 36" turn table)
- Jetline GTAW manipulator Welding Machines with Miller Maxstar Welders (Cold wire, 625 Inconel, 24" turn table)
- 7000 Series Brinell Hardness Tester with B.O.S.S. scope
- Magne-Tech Magnetic Inspection Unit (8 ft. bed)
